PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student with a strong academic record (8.96 CGPA) and hands-on project experience spanning blockchain, satellite data analysis, and intelligent monitoring systems. Comfortable across the stack from Python and full-stack web development to database design with SQL and MongoDB. Looking to bring this mix of analytical thinking and practical build experience to a Software Engineering or AI Internship.

PROJECTS

Blockchain-Based Blue Carbon Registry and MRV System Using Satellite Imagery

- Developing a blockchain-based platform for secure, end-to-end blue carbon credit management using satellite imagery.
- Utilized Python, Sentinel-2, and NDVI algorithms for environmental monitoring and spatial analysis of vegetation cover.
- Implemented Ethereum and smart contracts to record carbon credit transactions and maintain a transparent, tamper-proof registry.
- Working on the platform's MRV (Monitoring, Reporting, and Verification) component to strengthen data reliability and traceability.

Intelligent Forest Protection Monitoring System

- Developed an intelligent monitoring solution to support forest protection and environmental surveillance.
- Designed the system to enhance real-time monitoring efficiency through technology-driven surveillance concepts.
- Focused on making monitoring more consistent and less dependent on manual, on-ground patrolling.

CERTIFICATIONS and TRAINING

- **MongoDB Learning Path** — Basics, Document Model, Atlas, CRUD Operations, Transactions, Indexes, Aggregation, Vector Search, RAG, and Relational to Document Model.
- **Postman Classroom Program** — Centre for Open-source Software and Hardware (COSH), NITK Surathkal — March 2026.
- **Intro to Parallel Programming** — Mind Luster — August 2026.
- **ChipCraft: RTL, IP Integration & SoC Signoff** — 90-hour training under NIELIT and SoCTeamup Semiconductors — July–August 2026.
- **VTU–EBSCO & AMA Training** — Completed training by EBSCO Information Services at SJMIT — February 2026.

ACHIEVEMENTS

- Received a laptop for outstanding academic performance in SSLC, securing 97.44%.
- Receiving an annual scholarship of ₹75,000 in recognition of academic performance.
- Selected for the Destination Career Placement Readiness Program (2027 Batch) through the campus selection process in September 2026.
- Maintained an 8.96 CGPA through the 7th semester of B.E. in Computer Science & Engineering.
- Completed a 90-hour ChipCraft training under NIELIT and SoCTeamup Semiconductors.

SKILLS

Programming Languages: Python, C, Java (Core)

Databases: SQL, MongoDB (Atlas, Document Model, Aggregation, Vector Search, CRUD)

Core Subjects: Data Structures, OOP, DBMS, Operating Systems, Machine Learning

Tools & IDEs: GitHub, PyCharm, Jupyter Notebook, Visual Studio Code, MS Word, MS PowerPoint

EDUCATIONAL BACKGROUND

• 2023-2027	Bachelor of Engineering	
	SJM Institute of Technology, Chitradurga	CGPA:8.96/10
• 2023(PUC)	Government Girls PU College, Chitradurga	86.66%
• 2021(SSLC)	Government Girls Junior College, Chitradurga	97.44%
